Set of Federal Mahogany chairs attributed to workshop of Duncan Phyfe, New York, 1810-1815.

Sears Family Orange County New York.

A rare and unique complete set of ten carved mahogany chairs from the Federal period made in New York circa 1810-1815. The continuous line and curved stiles and seat rails are inspired by the Greek *klismos* chair form repeated here with this amazing set. The *klismos* form enjoyed a wide popularity in American variants from about 1810 until mid-century. Each of the top panels have a finely carved foliate waterleaf design joined to a carved central shell and lotus leaf with small carved rosettes on each side with an inset panel of rich tiger grain striped mahogany veneer flanked by a vertical carved waterleaf on top of each chair stile.

The unusual middle back splat of carved scrolls and flower rosettes reflects the embodiment of Egyptian motifs in American furniture design and used by Duncan Phyfe, New York ca. 1815-1820

The Sears family have over 200 years of Orange County history in New York

and complete sets of chairs of this period are extremely rare survivals.

Dimensions: Height: 32 inches, Width: 18 inches, Seat Height: 17 inches.
